

WATER CHARGER

Your skincare journey should start from within! Our inner skin treatment is an essential step to improve your skin's appearance from the inside out.

INFUSE HA

INNER SKIN TREATMENT

Hyaluronic Acid is a naturally occurring polysaccharide molecule in our bodies. Its primary function is to retain water and hydrate the skin and body. As we age, our bodies produce less Hyaluronic Acid, which can reduce the body's natural ability to retain water, reducing skin elasticity.

Infuse HA uses HAPLEX Plus, a cutting-edge, high-purity, food-grade form of Hyaluronic Acid made from the fermentation of bacteria and yeast. This specialized fermentation process results in small, potent molecules that are more efficiently absorbed and retained by the skin.

NEW FLAVOR!

- Increases skin's moisture and elasticity
- Prevent signs of aging such as fine lines and wrinkles
- Formulated with a combination of vitamins and minerals to protect and hydrate the skin

KEY ACTIVE INGREDIENTS

VITAMIN C - An antioxidant that works to help fight skin damage and help promote natural collagen production in the skin.

NIACINAMIDE - Builds keratin, which keeps the skin firm and healthy. This ingredient also helps your skin regulate oil production and reduces redness and the appearance of pores.

MAGNESIUM CITRATE - Improves mineral absorption, which increases skin hydration and the overall effectiveness of Infuse's other active ingredients.

WHO SHOULD USE INFUSE HA?

Infuse HA is formulated to benefit all skin types! However, if you are pregnant, breastfeeding, or have any serious medical conditions, please consult a health care professional before taking Infuse HA. Infuse is also not suggested for children younger than 4 years old.

HOW SHOULD INFUSE HA BE USED?

Mix one scoop with 8-12 ounces of your favorite hot or cold beverage once daily. For best results, stir the beverage to avoid clumping. Adults can use up to two servings daily.
